SMALL SYSTEMS
Water Distribution and Water Treatment

Developer and Owner - BC Water and Waste Association (BCWWA)

The Small Water Systems course provides a working knowledge of water distribution and water treatment practices and focuses on the basic aspects of system construction, operation and maintenance. This course will be of value to all operators of water distribution and/or water treatment systems, particularly those that serve a population of less than 500. Upon completion of the course, students will have satisfied the training requirements which, combined with appropriate experience, will make them eligible to write the Small Water Systems exam for the Environmental Operators Certification Program.

Topic	Objectives
Overview	• Understand Basic Water System & Regulations
Water Sources - Surface Water	• Understand water system components & surface water collection
Groundwater Sources	• Understand Groundwater regulation • collection • protection & well maintenance
Water Treatment	• Understand the basics of water treatment • filtration & groundwater treatment
Water Distribution	• Understand the basics of water distribution
Disinfection	• Identify purpose and types of disinfection and technology
Workplace Safety	• Understand different types of monitoring
Appurtenances	• Understand Water meters • valves • cross connection and fire hydrants
